

WISKIND CLEANROOM DOOR AND WINDOWS SYSTEM

WISKIND 万事达

COMPANY PROFILE

About Us

- Shandong Wish Wiskind Clean Technology Co., Ltd. is a high-tech enterprise specializing in clean room enclosure system engineering, ceiling system, various types of doors and windows and related equipment research and development, manufacturing, sales, consulting and service.
- The company introduces advanced equipment and production technology from abroad, and has the world's leading automatic production equipment for purifying doors and windows, serving many large-scale system engineering enterprises at home and abroad, in electronic semiconductors, bio-pharmaceuticals, food and medical, aerospace and scientific research, chemical and new Leading industries such as energy and engineering.

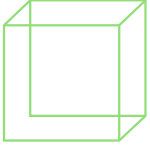

Our Products

- The clean room door is divided into four product series according to the material: color steel plate door, steel door, HPL door and stainless steel door core material are generally made of high quality flame retardant paper honeycomb or aluminum honeycomb to ensure the strength and flatness of the clean door.
- The clean room observation window is available in a variety of forms, including single and double glazing, with right angles and rounded corners. Wiskind clean room observation window integrated structure design, perfect combination with clean wall panel, not only good sealing performance, easy installation, and beautiful appearance, it becomes the highlight of clean room space.

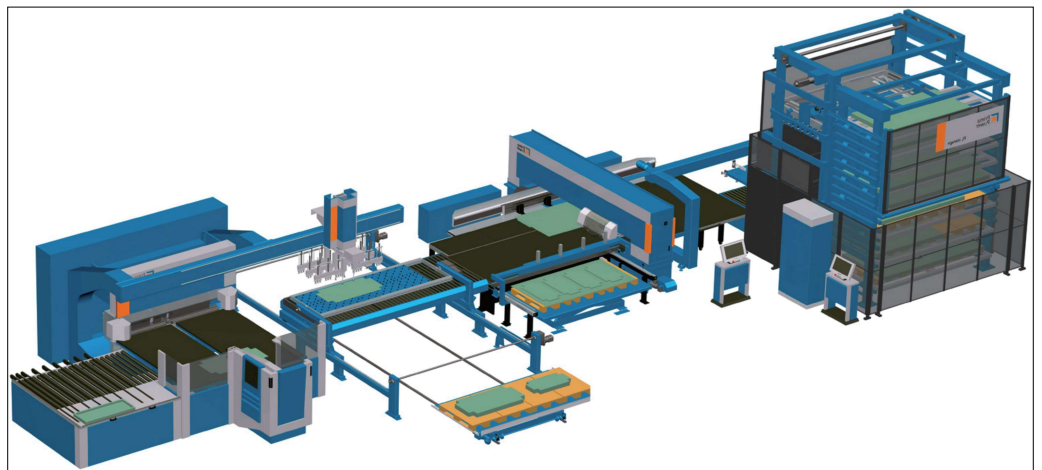

Our Service

Wiskind has a high-quality professional technical team to provide you with technical design support, program optimization, layout design and optimization, installation guidance and other technical service support. We always have professional technicians at your side to provide you with the best.

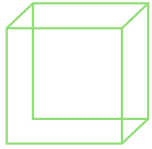

OUR STRENGTH

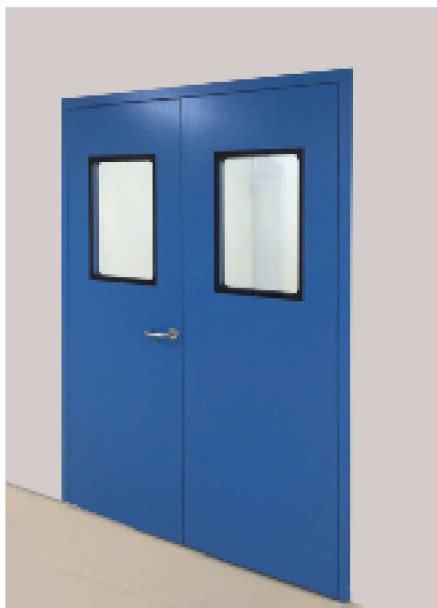

- Wiskind's clean doors and windows project has positioned high-standard products from the beginning of the project, and introduced more than 20 advanced door and window production equipment from the domestic market. From raw materials to door and window products, high-precision automated production processes occupy a leading position in the industry.
- Wiskind is in a leading position in the industry to meet the fierce market demand with first-class product quality. Wiskind has Italy PrimaPower Pumabao - all imported sheet metal production line, with automatic control of the front feed positioning shearing machine, CNC bending machine, and the use of multiple Japanese YASKAWA robotic welding and International advanced aluminum alloy door and window equipment, etc., can use the latest international technology and equipment to ensure product quality, further develop its own advantages, better serve customers and enhance brand image.

CLENROOM STEEL DOOR

- It is made of high-quality galvanized steel plate (or 304 stainless steel plate), which is made by integral bending and joint welding. The surface is electrostatic resin powder sprayed (stainless steel surface frosted).
- The overall surface is smooth and smooth, no dust and easy to clean. The core material of door leaf is made of flame retardant paper honeycomb (aluminum honeycomb) is filled, and the overall lightness and high structural strength.
- The observation window on the door is made of double-layer hollow tempered glass, surrounded by black printed edges (white printed edges). The window on the door is flush with the surface of the door leaf. It is beautiful and easy to clean, and does not fog if the temperature and humidity are different. It will not affect the observation.

Project	Technical Parameters
Specification	Single Door: 900mm*2100mm , 1000mm*2100mm Double Door: 1200mm*2100mm, 1500mm*2100mm
Material	The thickness of the door frame plate is galvanized sheet 1.2mm The thickness of the door leaf plate is galvanized sheet 1.0mm
Filler	Paper honeycomb, Aluminum honeycomb
Thick door frame	50mm, 75mm, 100mm
View panel	Right angle double glazing, Rounded double glazing, Frosted double glazing (border white and black)
Surface treatment	Electrostatic resin powder coating
Lock	304 stainless steel handle lock, elbow pressure ball lock, safety pressure bar lock (optional with GEZE, ALLEGION imported brand locks) can be equipped with electronic interlock
Hinge	304 stainless steel hinge
Sealing device	Door sealing strip, door bottom automatically pressing the sealing strip

Remarks: Accept customer requirements, produce products of different specifications and models.

Door edge strip

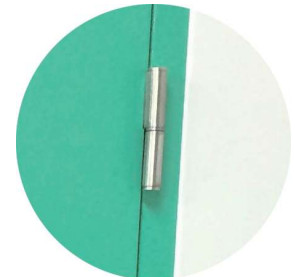

- The door is made of German production technology on three sides, imported polyurethane glue on-site foaming, excellent sealing performance (fire-resistant and food-grade glue foaming can be selected according to needs)

View panel

Regular size is 400mmx600mm, can be customized.

Hinge

High quality 304 stainless steel detachable hinge

Lock

The overall appearance of the parts have passed the 96-hour neutral salt spray experiment

Cleanroom door

Seal

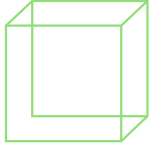

The door leaf closes automatically, and the airtight performance is excellent.

View panel

The observation window on the door is made of double-layer hollow tempered glass, surrounded by black printed edges (white printed edges). The window on the door is flush with the surface of the door leaf. It is beautiful and clean, and does not have a wide temperature and humidity environment. Fog, affecting observation.

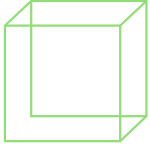

CLENROOM STAINLESS DOOR

Project	Technical Parameters
Specification	Single Door:900mm*2100mm , 1000mm*2100mm Double Door:1200mm*2100mm, 1500mm*2100mm
Material	The thickness of the door frame plate is galvanized sheet 1.2mm The thickness of the door leaf plate is galvanized sheet 1.0mm
Filler	Paper honeycomb, Aluminum honeycomb
Thick door frame	50mm,75mm,100mm
View panel	Double glazing, frosted glazing, round corners, right angles (white and black border)
Surface treatment	304 SS
Lock	304 stainless steel handle lock, elbow pressure ball lock, safety pressure bar lock (optional imported lock brand:GEZE,ALLEGION) can be equipped with electronic interlock
Hinge	304 stainless steel hinge
Sealing device	Door sealing strip, door bottom automatically pressing the sealing strip

Remarks: Accept customer requirements, produce products of different specifications and models.

Aluminum Profile Cleanroom Doors

The door frame and the edge of door leaf are made of high-strength aluminum alloy cutting and assembling angles. The door leaf surface is composed of color steel plate or melamine grease board. The overall surface of the door leaf is smooth and smooth, no holes, no dust, easy to clean; the core material of door leaf is made of flame retardant paper honeycomb (aluminum honeycomb) is filled, and the overall lightness and high structural strength.

Project	Technical Parameters
Specification	Single Door:900mm*2100mm , 1000mm*2100mm Double Door: 1200mm*2100mm, 1500mm*2100mm
Material	Door frame:High strength aluminum alloy Door leaf:Color steel plate, HPL(Resistant to VHP disinfection material)
Filler	Paper honeycomb, Aluminum honeycomb
Thick door frame	50mm,75mm,100mm
View panel	Right angle double glazing,Rounded double glazing,Frosted double glazing (border white and black)
Surface treatment	Electrostatic alumina profile
Lock	304 stainless steel handle lock, elbow pressure ball lock, safety pressure bar lock (optional imported lock brand:GEZE,ALLEGION) can be equipped with electronic interlock
Hinge	Aluminum cleaning special hinge
Sealing device	Door sealing strip, door bottom automatically pressing the sealing strip

Remarks: Accept customer requirements, produce products of different specifications and models.

The main surface of the door body is made of HPL board: the board is non-toxic, odorless, bacteria-resistant, wear-resistant, scratch-resistant, moisture-resistant and impact-resistant; the surface is seamless, dirt-resistant, not fading, dust-free, not Dust, easy to clean, can withstand the frequent disinfection of pharmaceutical factories (can withstand general VHP disinfection), the fire rating of the board can reach B grade.

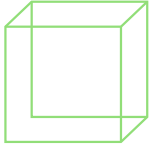

Cleanroom Windows

Wiskind uses double-layer ultra-white tempered glass, surrounded by black printed edges (white printed edges), aluminum alloy reinforced keel, internal hollow treatment, built-in desiccant, can be filled with argon, eliminate internal fogging, flush with manual board Beautiful and easy to clean.

Note: Compared with ordinary tempered glass, ultra-white tempered glass greatly reduces the self-explosion rate, the light transmittance is over 91%, the low light reflectivity, and the color consistency is extremely high.
