CRAFTSMANSHIP

The cleanroom steel glass door is suitable for cleanroom space with various environmental requirements, which is different from the traditional core material filled cleanroom door.

AESTHETIC UPGRADE

The door leaf and the door frame are all bent and welded in one piece, with beautiful appearance and strong durability

SIMPLE AND ELEGANT DESIGN

The width of the door leaf and the door frame is 5 mm.this frame is narrower and more beautiful

CONTINUOUS IMPROVEMENTS OF PRODUCT DETAILS

Irreparable details, safety and good quality

The welding process of the male corner at the corner of the door frame is carefully polished and ground, and the door leaf welding is required without missing welding to ensure the overall structural strength.

The perfect combination of clear door and tempered glass. The door is elastic, and the glass is strong and bright.

The door frame is embedded with a sealed strip, which is square, hanging and fixed, and the door leaf is flat.

Special hardware for cleanroom steel glass door, flexible opening and closing

UPGRADE CRAFT,WINDOWS ARE MORE RESILIENT

We conduct internal tests on our products for 'soft impact resistance.A 50kg sandbag is hoisted to impact the glass panel.Fully guarantee the quality of windows to customers.

BETTER SEALING PERFORMANCE

Clean room steel glass door sealing performance test
